**BEFORE THE
PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

In the Matter of the Application of San Diego Gas & Electric Company (U 902 G) and Southern California Gas Company (U 904 G) for Authority to Integrate Their Gas Transmission Rates, Establish Firm Access Rights, and Provide Off-System Gas Transportation Services.

A.04-12-004
(Filed December 2, 2004)

**REPLY COMMENTS OF
PACIFIC GAS AND ELECTRIC COMPANY (U 39 G)
ON PROPOSED DECISIONS**

In accordance with Rule 14.3 of the Commission's Rules of Practice and Procedure, Pacific Gas and Electric Company ("PG&E") hereby submits its reply comments on the firm access rights (FAR) proposal addressed in Proposed Decision ("PD") of Administrative Law Judge Wong and Alternate Proposed Decision ("APD") of Commissioner Brown issued October 31, 2006 in Phase 2 of the above-captioned proceeding of San Diego Gas & Electric Company ("SDG&E") and Southern California Gas Company ("SoCalGas") (collectively "SDG&E/SoCalGas").¹

PG&E generally supports both the PD and APD rulings adopting firm access rights (FAR) on the integrated systems of SDG&E/SoCalGas. The PD and APD properly order SDG&E/SoCalGas to provide a set-aside for the five G-XF long-term contracts with PG&E at the Kern River Station receipt point, and no party filed comments opposing this ruling.²

PG&E understands that some parties have filed comments opposing the adoption of any type of firm access rights on the integrated system of SDG&E/SoCalGas. For example, the Department of General Services argues that firm access "is not needed to assure that gas is

delivered in California.” This view ignores the problems of just a few years ago. The PD and APD correctly acknowledge that the basic underlying system of firm tradable transmission rights has worked and functioned well in northern California under the Gas Accord Structure.³ PG&E agrees that a system of firm tradable rights will be beneficial to the southern California market as well. One only needs to look at the 2001 energy crisis to see the benefits of firm tradable rights. As explained during the hearing, the PG&E system fared much better during that time because parties had surety that they would be able to get whatever gas they nominated through whatever receipt point they chose. On the other hand:

The SoCal system, the prices ballooned partly because there was no surety. Everybody would chase one interconnect. They would get prorated down and get a small fraction of the gas or they’d have to go to another receipt point to get the rest of the gas through. Caused a lot of havoc in the market down there. And you saw, you know, SoCal border prices compared to PG&E border prices at \$5 to \$6 higher.⁴

Even after the 2001 energy crisis, PG&E has had difficulty at times getting gas into southern California under the current SoCalGas allocation method. PG&E estimated that its deliveries to SoCalGas were cut more than 90 days each in 2004 and 2005.⁵ It is time to base flows into southern California on firm contract rights and replace the existing protocols that create great uncertainty.
